- Strong communication skills
- Problem solving

EDUCATION

Software Engineering

Moringa School

August 2022 - January 2023

Fullstack Development

Bachelor of Science in Software Development KCA University

2018-2022

KCSE

Maseno School

2014-2017

B+

PROFILE

I am a software development graduate with fundamental knowledge in software design, development, and testing. I am a team player who is committed to learning and gaining new experiences and seeking to utilize my broad educational background with excellent analytical, technical, and programming skills to thrive as a software engineer.

WORK EXPERIENCE

Onfon Media

IT intern

March 2022- June 2022

- Worked in networking, IT support and software development and got some experience across those different departments in the IT department
- Obtained a good understanding of the fullstack development process and various technologies used in frontend and backend development.
-

PROJECTS

Shopping Exchange

Duration: 2 weeks

Technologies: React, Redux, Ruby on Rails

Link: <https://shoppingexchange.vercel.app/>

Description:

I was responsible for building a web application called shopping exchange. The application was built using React for the frontend and Ruby on Rails for the backend.

The main focus of the web app was to compare prices of different commodities across various ecommerce platforms and compare the prices for the client to see. the client can click on the link to the ecommerce website they feel satisfies their price range.
